Unparalleled Comfort is a hallmark of the „TitanX”

The all-new PivotPro Seating with 360-degree swivel action allows anglers to access all parts of the boat and fishing angles with ease. The PivotPro ensures optimal comfort during long, rewarding fishing trips and features underseat tackle storage for easy access to gear.

Unrivalled Electronics and Motor Capabilities.

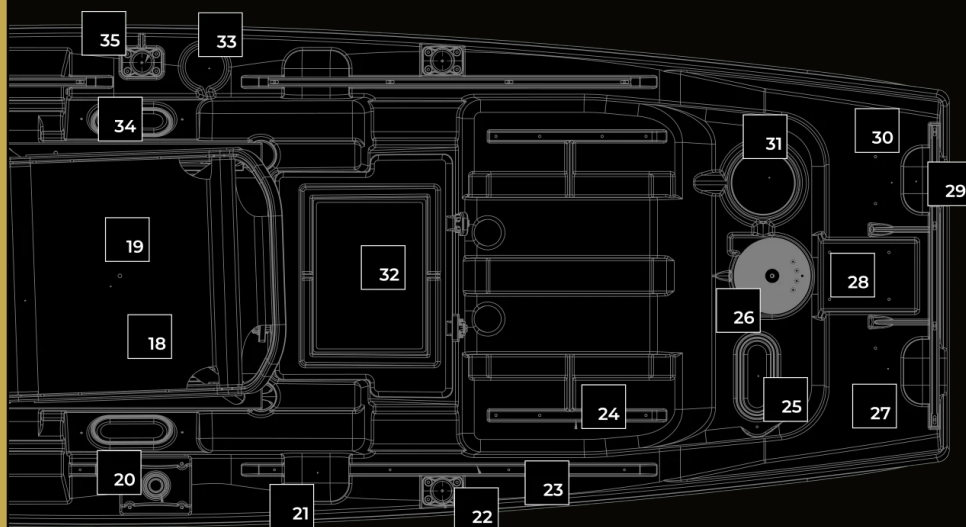

There is no question, electronics and motorization is the name of the game. The „TitanX“ sets a new standard in powered kayak versatility. The core of this design features two battery compartments, providing ample space for all your power storage needs. In conjunction with those compartments are access points, and “PowerLinks” located all over the boat to make running wire, mounting switches, and charge points a breeze with easy access to all sections of the boat. Seamlessly integrate your favorite fish finder, GPS, monitors, motors or other electronic devices, opening up a world of fishing possibilities.
